

Maintenance Tech / Mechanical Assembler

Location: Huntington Beach, CA

The Maintenance Mechanic is critical within the company and directly impacts day-to-day production, minimizing equipment downtime through preventive maintenance procedures. PVD Coatings is looking to bring on a talented 3rd shift Maintenance Technician. This role is in our Huntington Beach, CA warehouse. The hours for this position will be Monday through Friday, full-time from 9:15 pm-6:00 am.

Primary Responsibilities:

The maintenance Mechanic is responsible for troubleshooting and maintaining highly technical and automated PVD equipment, including air compressors, water chiller, sandblasting cabinets, and other equipment utilized. This position will perform troubleshooting on electrical, mechanical, gas, pneumatics, and cooling systems as needed and assist in continuous improvement and cost reduction efforts. System schematic reading is required to confirm proper troubleshooting.

Requirements:

- Strong equipment technical/mechanical aptitude with good decision-making skills and self-motivated.
- Understanding of electrical, mechanical, hydraulic, vacuum technology and related principles and tools.
- Hands-on and working knowledge of mechanical and computer-controlled machinery, previous experience with vacuum equipment or cutting tools preferred.
- Some welding, but not required to include: MIG, TIG, and Arc
- Familiar with automated equipment, pumps, gearboxes, pneumatic and hydraulic systems, and more.
- 480V 3 phase troubleshooting and wiring. Including low voltage controls.
- Perform and update equipment PM logs, record inspections, complete work on time (before the start of the next production day)
- Adhere to realistic project deadlines and update the Manager on progress. Inform the Manager of any potential or existing problems.
- Periodic maintenance and, depending on the repair needed, correct the problem or report any equipment in need of repair to the management.
- Understanding and occasionally operating PVD coating equipment according to company specifications.
- Understands and has a working knowledge of the various processes, procedures, and functions; use and understand basic computer entry and processing skills.
- Adapts to changes in the work environment; Organizes and maintains levels of project timeline demands; Changes approach or method to fit the situation best; and deals with frequent change, delays, or unexpected events.
- Troubleshoots problems and determines the action.
- Legal authorization to work in the U.S.

Compensation & Benefits:

- 100% Employer-Paid Medical + Dental + Vision Insurance options for employees
- 401(K) Plan with company match • Profit Sharing plan
- Flexible Spending Accounts
- Basic Life and AD&D/Long Term Disability
- Paid time off
- Discounts on theme parks, movie tickets, sports, hotels, and more
- Employee referral bonus program • Employee Assistance Program

About Us:

If we had to describe our company culture in one word, it would be "yes." "Yes" to allow customers to mix and match any handle with any spout in any finish. "Yes" to quick delivery. And, most importantly, "Yes" to unparalleled customer service. By joining our team, you'll help us ensure that we maintain the culture that makes "Yes" possible. In the spirit of "Yes," your great ideas will be warmly welcomed. From our products to our people, we're truly unmatched! If you're looking for a fast-paced, innovative, and welcoming workplace, then a career with our company is right for you.
