

# INTERNATIONAL BALLROOM NORTH

## Monday, May 6

Table	Technology Forum Breakfast
1	Digitalization in the Coating Industry – Does It (Already) Improve Production and Product?!
2	CVD and ALD Processing
3	Optical Coating Design
4	Thin Film Sensors
5	Advanced Deposition Coating Hardware
6	Ultra-Thin Flexible Glass – The Next Big Thing
7	Supply Chains, Manufacturing Processes, and Sustainability for Materials Enabling PVD Processes
8	Coatings for Thin Film Photovoltaics
9	Aligning Deposition Process Requirements with Vacuum Systems

## Tuesday, May 7

Table	Technology Forum Breakfast
1	Magnetron Sputtering
2	Leak Detection – Issues and Practices
3	HIPIMS
4	High-Powered Electron Beam Technology
5	Industrial Challenges: Uptime, Yield, and Consistency
6	Tribological and Diamond-Like Carbon Coatings
7	Coatings and Surface Engineering for Medical Applications
8	Process Monitoring and Control
9	Energy Conversion and Storage

## Thursday, May 9

Table	Technology Forum Breakfast
1	Surface Engineering for the Hydrogen Economy
2	
3	Manufacturing in Space
4	Fabrication and Performance of Optical Coatings
5	Atmospheric Plasma Technology
6	Post-Processing of Vacuum-Coated Roll-to-Roll Products
7	
8	Protective, Reflective, and Decorative Coatings
9	Transparent Conductive Materials

See table map on next page.
