- Presenters requiring other specialized equipment or software must contact SVC before April 1, 2025

Tips for Giving a Successful Presentation:

- Prepare note cards to organize a brief outline of ideas.
- Rehearse your presentation.
- Explore the equipment (i.e., lights, projector, microphone, etc.) operation prior to giving your talk.
- Look at the audience. Eye contact is essential. Make sure you address all areas of the room when you are presenting; make everyone attending feel that you are speaking to them.
- Present a discussion of your paper—don't just read your paper.
- Allow time at the end of your presentation for questions. Moderators will start each new presentation promptly.
- Repeat questions before responding with an answer.
- Don't forget: Have fun! People are there to hear what you have to say and they all know how difficult it is to stand in front of a crowd.

Most Effective Visuals Are:
